\$43,472 Increase in Equity of Home per Department of Energy (2014) - \$4.18/watt

Electricity Bill Savings

Rate not specified, using Residential Standard Distribution Generation based on location.

Your projected energy cost is calculated by considering a 4.0% increase in energy cost each year, due to trends in the raising cost of energy. This estimate is based on your selected preferences, current energy costs and the position and orientation of your roof to calculate the efficiency of the system. Projections are based on estimated usage of 13800 kWh per year, assuming Residential Standard Distribution Generation Electricity Tariff.

Your electricity tariff rates may change as a result of installing the system. You should contact your electricity retailer for further information.

Re-Roof	\$22,000.00
Total System Price	\$76,920.00

Additional Incentives

Additional Deduction (22% Tax Bracket) - 19% Rebate // Crown CPA	\$14,614.80
Federal Investment Tax Credit (ITC) - 26% Rebate Tax credits are an estimated amount. As the purchaser and owner of a solar photovoltaic system, you may qualify for certain federal, state, local or other rebates, tax credits or incentives (collectively, 'incentives'). If you have any questions as to whether and when you qualify for any incentives and the amount of such incentives, please consult and discuss with your personal tax or financial adviser. Sunlight and Ecovole make no representation, warranty or guaranty as to the availability or amount of such incentives.	\$19,999.20
Total Additional Incentives	\$34,614.00
Net System Cost	\$42,306.00
